Breathe Better Live Better

Safety of Therahaler O2Gold

Therahaler O₂ GOLD was taken to Professor Terry Doyle (School of Physics, University of KwaZulu Natal, South Africa) for assessment regarding the possible productions of free radicals - He gave it a clean bill of health - his letter below.

School of Pure and applied Physics
University of Natal

To whom it may concern Dear Sir/Madam

IONIZATION OF OXYGEN/NITROGEN MOLECULES AT NTP IN MODERATE MAGNETIC FIELDS

This is to confirm my considered opinion, based on calculations of the appropriate energies involved, that the probability of the ionization of oxygen or nitrogen molecules (i.e. the formation of free radicals) at normal temperature and pressure, when in magnetic fields of order/less than 1 T (i.e. typical fields at the surface of permanent magnets) is vanishingly small.

Yours faithfully,

Prof Terence B. Doyle.
Head of School.

Risk on sick patients

Dr. Mike Van Der Linden, well know Pulmologist, tested **Therahaler O2 GOLD** for safety on 45 Asthmatic Patients over a four month period. He found that **Therahaler O2 GOLD** was completely safe - Not one adverse reaction, He also found that 62% of the patients showed significant improvement in quality of life, reduction in medication, more physical activity and better breathing. 20% of the patients showed moderate improvements and 18% sowed little or no improvement.

"I believe that **Therahaler O2 GOLD** has proven to be a positive adjunct therapy without any side effects and does seem to result in a significant improvement in the patients quality of life."

Dr. M.D. Van Der Linden
M.B. B.Ch. (WITS) AvMed. (LAM) FCP (SA)
Specialist Physician and Pulmologist

Conclusion: Therahaler O2 GOLD does not utilise any Medicine or ingested agent but directly energises inhaled atmospheric oxygen with Bio-Magnetic energy, Thus enhancing blood oxygen levels in a completely safe and natural manner. Therahaler O2 GOLD may be used by people of all ages, under all medical conditions.
